This image contains a comprehensive legend for surveying and engineering maps, including:

- Topographic Symbols:** Various patterns and line styles for terrain features like hills, roads, and water bodies.
- Building and Infrastructure:** Icons for buildings, walls, roads, bridges, and specific structures like power lines and telephone poles.
- Transportation:** Symbols for railroads, highways, and airports.
- Geological and Landmarks:** Icons for geological formations like rocks and soil types, as well as landmarks such as temples and shrines.
- Administrative and Social:** Symbols for government offices, schools, and other social institutions.
- Water Bodies:** Icons for rivers, lakes, and coastal features.
- Engineering Features:** Symbols for dams, reservoirs, and industrial structures.
- Surveying and Construction:** Symbols for survey points, benchmarks, and construction details.

The legend is organized into several columns, each containing multiple entries with their corresponding symbols and labels. The labels are written in Japanese, and some entries include English translations or descriptions.
